

## **Construction Site Waste Management Policy**

### **August 2024**

#### Purpose

E Light Electric Services Inc. is committed to implementing a comprehensive waste management policy that addresses the proper handling, storage, and disposal of waste and scrap materials on our jobsites. Before the start of any project, we assess and plan for the management of project wastes, trash, and scrap, ensuring that all necessary measures are in place. Our employees are informed of the proper handling and storage procedures during project orientation, emphasizing the importance of waste management. We prioritize the recycling of production waste whenever possible, implementing recycling programs and working with local facilities to ensure proper disposal. Regular inspections and monitoring are conducted to ensure compliance, and we continuously strive to improve our waste management processes through staying abreast of regulations and industry best practices. By fostering a culture of waste management and environmental responsibility, we aim to minimize our environmental impact and promote sustainable practices within the construction industry.

#### Policy

1. Before the start of any project, project management will assess and take into consideration the management of project wastes, trash, and scrap materials. This includes developing a project-specific waste management plan that outlines the procedures and practices to be followed throughout the project duration.
2. Proper and safe handling and storage of waste and scrap materials will be prioritized on the jobsite. This includes providing designated waste disposal areas or containers that are clearly labeled and easily accessible to all workers. The waste disposal areas will be regularly monitored and emptied as needed to prevent overflow and maintain cleanliness.
3. During project orientation, all employees will be informed of the proper handling and storage of waste materials. This will include training sessions or presentations that emphasize the importance of waste management, as well as the specific procedures to be followed. Employees will be made aware of the types of waste that can be recycled, disposed of, or require special handling.
4. A recycling process shall be implemented whenever feasible on our projects.
5. Regular inspections and monitoring will be conducted to ensure compliance with the waste management policy. This includes periodic checks of waste disposal areas, proper storage of waste and scrap materials, and adherence to recycling practices. Any deviations or issues will be promptly addressed, and corrective actions will be taken.
6. E Light Electric Services Inc. will stay updated on local waste management regulations and industry best practices to continuously improve waste management processes. This may include implementing new processes that promote more efficient waste reduction and recycling.
7. A culture of waste management and environmental responsibility will be fostered among all employees. This will involve ongoing communication, training, and awareness training to

promote the importance of waste reduction, recycling, and responsible waste management practices.

By implementing this waste management policy, E Light Electric Services Inc. aims to minimize the environmental impact of its operations, ensure compliance with waste management regulations, and promote sustainable practices within the construction industry.
